

Response	Your overall impression of the workshop? (1-4)	Initial welcome/linkage to RTP Workshop? (1-4)	Presentations on ORD/Region collaboration/transfer? (1-4)	Panel on local collaboration/transfer experiences? (1-4)	Afternoon session with Regional staff sharing experiences and developing next steps? (1-4)	What did you learn that you are most likely to take back and use on the job?	What follow-up activities would you like to see from this workshop?	What could be done to facilitate your future interaction with Regional staff you met at the workshop...with Regional staff in general?	If you had planned this workshop, what would you have done differently?	Do you have any other comments?
1	4	4	3	4	Unable to attend	How interacting with ORD regions can be a winning situation for all with limited resources/ funding in the future collaborating across regions with similar research projects makes a lot of sense.	Maybe 1-2 people from a branch can get involved to see how their branch's research projects could be integrated into regional collaborated work.	Unsure at the present time.	Nothing, the workshop was very well planned, the questions and conversation which occurred led to informative discussion.	None.
2	4	4	4	4	4	The Regional team was consistent in wanting the collaborations to include themselves via FYI at a minimum. That seemed reasonable and I think the energized group in the afternoon will follow through.	Some tracking of collaborations with the Regions. Not sure how or who should be responsible for that.	More workshops like ours (every 2 years?) at each major facility.	Nothing.	It was a good follow-on meeting to the 2005 RTP workshop.

3	4	4	2	2	3	Collaborative efforts in risk communications.	More organized region wise.	Better communications.	Get more region-wide collaboration.	No other comments
4	3	3	3	3	3	Knowledge of who the ORD liaisons in the Regions are and the fact that they are assigned focus areas each year (I never knew that!)	Examples of successful collaborations and how they were established.	Is there a way to post a general question so that all the Regions see, without having to contact all ten individually myself? Often, I have an application that is not site specific and may be applicable to more than one region. To find a willing collaborator, I feel like I have to go hunting and just hope to find someone.	Tried to get ALL the Regional Liaisons to attend.	N/A
5	4	2	4	4	4	How possible connections are made.	I see none at this time.	More of these meetings.	Don't know.	None at this time.
6	4	3	4	3	4	Basics about RSL/HSTL roles/functions. Direct contacts w/ RSLs/HSTLs.	I have already followed up by directly contacting the RSLs/HSTLs with basic information about our current research. The feedback has been very good.	Try to figure out how increased work/collaboration w/regions could be crammed into the GPRA/PART framework.	1) Required attendance by management (I don't know how, though). 2) Set up a formal "experiences" panel from the RSL/HSTL side. This occurred anyway, informally, during the afternoon session.	N/A

7	3	3	3	4	3	Just seeing the faces of the liaisons and getting a list of all the names of the liaisons. Also finding out how open they are to collaboration.	N/A	I think the ball is sort of in our court to contact them for collaborations.	More one on one talking with the liaisons	N/A
8	3	3/Didn't attend RTP	4	3	2	Who, exactly, at CI is open/interested in collaborating/ reaching out to the Regions	More like it.	Not applicable	Increase participation	N/A
9	3	3/Didn't attend RTP	3	4	Didn't attend	Ideas for collaboration with regions. Additionally, I now know about the various people to contact in the regions.	A chart of ways to interact with stakeholders and the regions.	ORD personnel could visit regions to see what their requirements are for research. This would give scientists a different perspective and would help them to see ways in which their work could be implemented in the regions.	I was unable to go to the whole workshop and was not at the afternoon session, however, you could break the workshop into smaller focus groups that would then discuss ways to interact and collaborate between ORD and the regions.	N/A

10	3	3	2	N/A	N/A	Regional priorities and contacts.	I wasn't able to hear much of the afternoon session but think that it would be important to find one or two key activities (next steps) and have them implemented.	N/A	I really like the focus on positive collaborations, it set the right tone. It may have been helpful to have some posters displayed to further discussions and engage more staff and provide a broader spectrum of ongoing activities across ORD. Also, it would be helpful to get more of the NPD engaged in these workshops so that regional needs and interests are more part of the ORD planning process.	I think it was a great beginning, just need to keep the effort going.
11	3	N/A	3	3	3	How to coordinate ORD research needs with RSLs and HSTLs	Email communication of potential projects between ORD Cincinnati, RSLs, HSTLs, and Regional Personnel	Email communication of potential projects between ORD Cincinnati, RSLs, HSTLs, and Regional Personnel	Include more participants from all of the EPA Regions (RSLs, HSTLs, and Regional Personnel)	N/A
12	3	3	4	3	Didn't attend	I'm trying to use the take-home lessons to set up a workshop with region 5 on PBTs.	N/A	More contact with regional scientists. More information on regional science needs.	N/A	N/A
13	2	3	2	2	2	Contact, names, addresses, etc. of important connections.	Contact with above.	N/A	N/A	N/A

14	3	N/A	2	2	3	Names of RSLs, what they do, how to find them.	I'll call RSLs when I do work in Regions or need contact information.	Topical meetings between Regional staff and NRMRL. Perhaps a NRMRL roadshow that highlights our products.	Talk specifics instead of generalities.	N/A
15										I only attended a few of the morning talks, so I don't want to comment on the whole workshop. The few talks I saw were informative, especially Flo's.
16	4	4	4	4	3	I wish I could spend more time with my Cinc clients!	Cinc researchers bringing their work to the Regions via webinar activities.	More "synthesis" types of email or web-based products that RSLs could "shop" to selected Regional folks.	Planned more one-on-one time between RSLs and Cinc scientists.	Thanks for your great hospitality and willingness to share your work and ideas with the RSLs!
